- Financial Management
- Contract Administration
- Training

Technology:

- Primavera Project Planner
- SureTrak Project Manager
- Oracle Financials
- MS Access
-
-

Project Description:

Nextel Communications, Inc. is North America's leading provider of fully integrated all-digital cellular services. In August 1998, the company announced that Nextel Partners, Inc. (NPI) would build-out mid-size and small markets, and many rural areas, fulfilling Nextel's objective of expanding its system coverage to substantially all markets in the United States. This \$500 million fast track program to deploy 1650 sites will be completed over the next three years.

S&R has designed and implemented an enterprise management system for NPI which:

- ✓ facilitates top-down, as well as, bottom-up, planning
- ✓ manages labor, materials, and contracts while optimizing cost versus revenue in response to market dynamics
- ✓ integrates Primavera Project Planner with existing procurement and financial systems

In Phase II, our project controls and financial management personnel will be assigned to eight regional offices to support planning and performance efforts for the Program and communicate daily performance to corporate offices.
