

**BELLSOUTH**  
**Roof Asset Management Program**  
**Fuel Tank Replacement Program**

**Client:**  
Beers Corporate Services  
229 Peachtree Street  
Suite 2205  
Atlanta, GA 30303

**Project Start:**  
March, 1996

**Project Completion:**  
May, 1997

**Project Features:**

- Scheduling
- Training
- Systems Integration
- Database Design
- Financial/Accounting

**Technology:**

- Primavera Project Planner
- SureTrak Project Manager
- MS Access
- MS Excel
- COINS

**Project Description:**

These multi-year Programs provide for the maintenance and upgrade of BELLSOUTH's facilities throughout the nine state Southeastern region. Resource availability of designers and contractors, cash flow, and environmental regulations are key considerations in the development of Program priorities and schedules. In the case of the Roof Asset Management Program, schedules are further constrained by the need to accommodate varying weather conditions in each state, for example hurricane season in Florida.

S & R Associates, Inc. implemented Primavera's scalable "Concentric Project Management"™ software solution of SureTrak Project Manager and Primavera Project Planner for each Program. SureTrak provides the low cost scheduling alternative for Project Managers to use in the field on laptop computers, while Primavera provides the power in the office to produce the integrated Program plan.

Additional activities included "hands on" training, database design, and systems integration between Primavera, MS ACCESS, MS Excel, and COINS.
