- System Testing
- Training
- Documentation
- Systems Integration
- Database Design

Technology:

- CCPMIS
- dBASE
- Primavera Project Planner
- R & R Report Writer
- Novell Netware

Project Description:

In 1991, Cobb County, GA contracted with a Program Management firm to design and implement a management information system for its Capital Improvement Programs. This system, referred to as the Cobb County Program Management Information System (CCPMIS), is a multi-user application developed in Clipper and accessed by approximately fifty (50) Users via a Novell network. It contains integrated Engineering, Right-of-Way, Construction, Estimating, Scheduling, Financial and Contract Administration modules.

S & R Associates, Inc. was hired to evaluate the system, recommend enhancements, and transfer technology to the County. Tasks included:

- testing the system and reviewing User documentation
- compiling detailed findings for review and resolution by the Program Manager
- training the County's System Administrator
- supplementing the System documentation with an Entity-Relationship Diagram
- defining the interface to Primavera
