

**1996 Summer Olympics
Program Planning and Control
AutoCAD Support**

Client:

O'Brien-Kreitzberg
260 Peachtree Street
Suite 1850
Atlanta GA 30303

Project Start:

May, 1994

Project Completion:

May, 1995

Project Features:

- Design/Drafting
- Planning/Scheduling
- Contract Administration

Technology:

- AutoCAD
- Primavera Project Planner
- Expedition

Project Description:

In the summer of 1996, Atlanta hosted the Centennial Olympic Games, the largest gathering of nations in the history of the world! The preparations, which took almost a decade, resulted in the construction of many new facilities and the renovation of an even larger number of existing ones.

While the decision to size and configure the facilities to support Post-Game yielded a significant cost savings, it created an enormous challenge to procure, install, and remove sufficient Temporary and Portable Facilities and Equipment (TPFE) to support the increased demands of Olympic use in an extremely limited amount of time.

As a member of the TPFE Team, S & R Associates, Inc. :

- reviewed and evaluated various Program Management methodologies and made recommendations regarding issues such as lower-tier subcontracting strategies, progress evaluation and payment, information systems, and the effect of funding/revenue sources on the Program.
- provided design and AutoCAD support

S & R Associates, Inc.
